Ren Yin

Tokyo, Japan | +81-90-3828-2520 | yin-ren217@g.ecc.u-tokyo.ac.jp

EDUCATION

The University of Tokyo Tokyo, Japan
B.S. in Information and Communication Engineering | *Major GPA: 3.71/4.00* *Apr 2022 – Mar 2027 (expected)*
- Selected coursework: Artificial Intelligence (A+), Algorithms (A+), Statistical Machine Learning (A), Written and Spoken Language Information Processing (A+).

Northeastern University Boston, MA, USA
Exchange Student, Computer Science and Data Science | *GPA: 4.00/4.00* *Sep 2024 – Apr 2025*
- Selected graduate-level coursework: Introduction to Machine Learning and Pattern Recognition; Reinforcement Learning.

HONORS & AWARDS

Nakajima Foundation Scholarship for Overseas Graduate Study 2027–2029 (initial term)
- Awarded to approximately 10 students nationwide across three fields for graduate study abroad.
- Provides approximately US$30,500/year for living expenses and up to US$19,000/year for tuition during the initial two years, with potential extension up to five years.

PUBLICATIONS & MANUSCRIPTS

[1] **Ren Yin**, Takashi Ishida, Masashi Sugiyama. Towards Scalable Oversight via Partitioned Human Supervision. *International Conference on Learning Representations (ICLR)*, 2026. [Code]

[2] **Ren Yin**, Katsuhiko Ishiguro, Masaharu Hirose, Keita Higuchi. *Learning from Partially Corrected Labels: A Framework for Human-in-the-Loop Data Curation with Statistical Guarantees*. **Under Review**, 2026.

RESEARCH & EXPERIENCE

The University of Tokyo Tokyo, Japan
Interactive Intelligent Systems Laboratory *Apr 2026 – Present*
- Supervised by Prof. Koji Yatani.
- Investigating sycophantic behavior and alignment risks in LLM-based mental well-being applications, focusing on human–AI interaction.
- Analyzing how multi-round interactions in LLM based multi-agent systems affect response diversity, answer convergence, and collective reasoning.

SB Intuitions Corp. Tokyo, Japan
Research Intern, HCI Team *Jul 2026 – Present*
- Developed a statistical learning framework for learning from partially corrected labels, establishing theoretical guarantees for human-in-the-loop data curation.
- Conducted empirical evaluations and human-centered experiments to investigate the practical utility of historical correction feedback.

Preferred Networks, Inc. Tokyo, Japan
Summer Research Intern; Part-Time Employee *Aug 2026 – Present*
- Investigating long-tail behavior in LLM-as-a-Judge evaluations, characterizing the scenarios that give rise to unreliable judgments.
- Exploring soft-label-based approaches to mitigate long-tail evaluation errors and improve the reliability of LLM-based assessment.

RIKEN Center for Advanced Intelligence Project (AIP) Tokyo, Japan
Research Assistant, Imperfect Information Learning Team *Jul 2024 – Aug 2024; Jun 2025 – Mar 2026*
- Supervised by Prof. Masashi Sugiyama and Prof. Takashi Ishida.
- Led the development of a weakly supervised learning framework for scalable oversight; proposed an unbiased estimator with finite-sample guarantees and validated its effectiveness through empirical evaluation (ICLR 2026).

- Investigated regularization under class imbalance, including flooding-based methods and uncertainty-adaptive strategies, through systematic empirical analysis.

Northeastern University Boston, MA, USA
Research Volunteer, Lab of Prof. Jennifer Dy *Oct 2024 – May 2025*

- Supervised by Prof. Jennifer Dy.
- Developed and evaluated unsupervised clustering methods for multimodal clinical data to investigate disease subtype structure.
- Built regression models integrating genomic and clinical features to study COPD-related outcomes, conducting feature analysis and predictive evaluation.
- Investigated stability and convergence in continual federated learning with prototype-based personalization through empirical evaluation.

CONFERENCE PRESENTATIONS

[1] Mapopa Chipofya, Eyob Gebeyaw, Jose Santos Cabrera, **Ren Yin**, Woojoo Na, Fatemeh Tohidian, Davin Hill, Jennifer Dy, Adel Boueiz*, Peter J. Castaldi*, Enrico Maiorino*, for the COPDGene Investigators.
Two-Stage Omics Model Matches Clinical-Based Prediction of COPD Exacerbations.
Poster Board 4112W. Poster presented at: ASHG 2025 Annual Meeting, The American Society of Human Genetics; October 15, 2025.

[2] Eyob Gebeyaw, Mapopa Chipofya, Jose Santos Cabrera, **Ren Yin**, Woojoo Na, Fatemeh Tohidian, Davin Hill, Julian Hecker, Raúl San José Estépar, James Ross, Jennifer Dy, Enrico Maiorino, Peter J. Castaldi*, Adel Boueiz*, for the COPDGene Investigators.
Alpha-1 antitrypsin genotype modifies proteomic associations with local histogram emphysema phenotypes.
Poster Board 9133T. Poster presented at: ASHG 2025 Annual Meeting, The American Society of Human Genetics; October 16, 2025.

INVITED TALKS

[1] Top Conference Session on Learning Theory and Its Applications, Forum on Information Technology (FIT 2026), Kitakyushu, Japan, Sep. 2026.

ACADEMIC SERVICE

- Reviewer, International Conference on Learning Representations (ICLR 2027).

TECHNICAL SKILLS

Programming: Python, C, JavaScript, MATLAB
ML Frameworks & Libraries: PyTorch, Hugging Face, NumPy, Pandas
Tools: Git, LaTeX
Languages: Mandarin Chinese (Native), Japanese (Native), English (Professional working proficiency)

RESEARCH INTERESTS

Statistical Machine Learning; Weak and Semi-Supervised Learning; Learning from Human Feedback; Foundation Model Evaluation and Alignment; Human–AI Interaction; Continual Learning
